KEY HIGHLIGHTS

SPECIFICATIONS

The screenshot displays the Admin Studio interface. On the left is a sidebar with navigation links: Dashboard (Today), Orders (Live), Products (Catalog), Categories (Browse), Users (Manage >), Roles (RBAC), Modules (Source), and Configuration (Browse). The main area is titled 'ADMIN WORKSPACE' and 'Store dashboard'. It features several key performance indicators (KPIs) and management sections:

- Gross sales:** \$48,260 (+12.4% compared with last week).
- Orders to fulfill:** 128 (21 urgent, packed before 6 PM cutoff).
- Inventory health:** 96% (8 low-stock SKUs, catalog is mostly stable).
- Delivery score:** 4.8/5 (On-time 94%, returns remain under target).

At the bottom, there are two more sections: 'Recent orders' with a table header (ORDER, CHANNEL, TOTAL, STATUS, CUSTOMER) and a note about conversion up 6.2% today, and 'Inventory watch' highlighting 'Low stock needs attention' for 'Cloud Weave Hoodie'.
